

Electric Spreaders — 12" conveyors — for pickups, one-tons, flatbeds, dumps & utility vehicles

1/3 to 2.5 yd

Perfect for driveways, sidewalks, campuses and small parking lots, these quiet electric sanders operate at walking speed — 3 to 5mph. (Our gas and hydraulic sanders operate at higher speeds suitable for large lots, roads and highways.) Because they include a full 12" conveyor, they handle wet materials as well as dry, and work with sand, salt or any

combination. Like our larger sander, these include an adjustable feed gate and adjustable flaps so you can control the rate, width and direction of the flow. The spread pattern is adjustable from 4' to 30'. Available in painted or Type 304 stainless steel, our electric sanders are quiet and need little maintenance for years of trouble-free use.

The Baby — Mounts in a truck bed or to a receiver hitch. Full conveyor in a 2' hopper. The Baby holds 9cu ft (1/3 yard).

The Junior — has a 4' hopper, can be used on a utility vehicle or in a pickup. Choose from 1/3 or 2/3 yard capacity.

All Electric — 92" hopper for quiet operation in a pickup sized sander. Available from 1yd to 2 2/3yd capacities.

Tailgate Insert Sander Electric spreader for pickup dump inserts

Add an efficient tailgate spreader to your dump insert. Replace your standard tailgate with the IP-140 Tailgate Spreader. Powered by two 12-volt electric motors, it features an adjustable spread pattern fed by a 6" auger. Spinner stays level at all dump insert angles. Compatible with some other insert brands too.
